Rainbow Currency is NOT an investment into a certain project. When you own Rainbow Currency, you are not holding any partnership, stock, or revenue share rights.

You simply hold a smart new cryptocurrency, that has been built to make global and local payment processes safer, cheaper, and easier.

After ICO, the currency will be managed, controlled, and represented by the Rainbow Foundation, a non-profit foundation to be registered in Delaware, USA.

The board of the Rainbow Foundation will consist of 7 people, which will be elected by all currency holders, from 7 different continents/regions.

Thus, it is guaranteed, that nobody will be able to change the rules, or to manipulate the currency.

YOUR EVERYDAY MONEY

The cryptocurrency and blockchain industry is going viral, or at least, it feels like that. In fact, less than 0.2% of all Internet users own any cryptocurrency and only about 0.1% of all businesses accept cryptocurrency as a payment.

Due to a bad reputation because of the use of cryptocurrencies by criminals for money laundering and other criminal activities, due to high fees or long processing times especially for smaller amounts, and due to the public visibility of each private transaction, bitcoin and other cryptocurrencies are seen very critical by many experts, governments, and Internet users.

Rainbow currency has been created to solve these problems. Thanks to a unique 2-wallet solution, the whole currency is always fully transparent, decentralized, and safe in the blockchain, while everyday payments for shopping and services can be made online and at POS fast, secure, and without fees.

To be qualified for online and local payments, the currency holder must go through a verification process to identify themselves, while only accredited business partners are allowed to receive these payments. Thus, we make it difficult and uncomfortable to participate for the bad guys.

Rainbow Currency is backed by United American Capital Corporation, which has been founded 2004 in Oregon. The main business purpose is investing in promising start-up companies, one of them named SafeZone. SafeZone has developed a unique business model, combining state-of-the-art privacy and security features with strong marketing strategies. Thus, SafeZone (www.safe.zone) is attracting Internet users and businesses alike. Rainbow Currency will be the official partner of the SafeZone, and right from the start, many online-shops and service providers as well as local POS will accept Rainbow Currency for payments.
